READING COMPREHENSION

What caused the Titanic to sink?

Titanic was a passenger ship that struck an iceberg on her maiden voyage from Southampton, England, to New York City, and sank on 15 April 1912, resulting in the death of 1517 people. It was one of the deadliest disasters in history.

How many people were on board the Titanic when it sank?

Titanic was the largest passenger steamship in the world and was owned by the White Star Line. It was constructed in Belfast, Ireland. After setting sail for New York City on 10 April 1912 with 2223 people on board, she hit the iceberg four days later at 11:40 P.M. on 14 April 1912 and sank at 2:20 A.M. the following morning.

SUMMARISING

Main Idea

- Titanic was a passenger ship that struck an iceberg and sank on 15 April 1912.
- The disaster resulted in the deaths of 1517 people, making it one of the deadliest maritime tragedies in history.
- It was the largest passenger steamship in the world and was owned by the White Star Line.
- The ship was constructed in Belfast, Ireland and set sail for New York City on 10 April 1912 with 2223 people on board.
- On 14 April 1912 at 11:40 P.M., Titanic struck an iceberg.and sank within a few hours, at 2:20 A.M. on 15 April 1912.

Why did so many people die on the Titanic despite its advanced design?

What rule did the Titanic crew follow during the evacuation, and how did it impact the number of deaths?

The ship carried lifeboats for only 1178 people. The ship's crew enforced the rule 'women and children first' which was partly responsible for the death of a large number of men aboard the ship.

Titanic was designed by experienced engineers, using some of the most advanced technologies and extensive safety features of the time. It is really sad that the liner so impeccably designed sank on her maiden voyage. The high loss of life, the famous victims of the tragedy, the legends about the sinking, the resulting changes in maritime law and the discovery of the wreck have all contributed to the steadfast interest in Titanic.

SUMMARISING

- The Titanic had lifeboats for only 1,178 people, not enough for everyone.
- The rule "women and children first" led to many men losing their lives.
- It was built with advanced technology and safety features for that time.
- Even though it was well-designed, it still sank on its first trip.
- The huge loss of life, famous passengers, and stories about the sinking keep people interested.
- Maritime laws changed, and the wreck's discovery made the Titanic even more famous.

QUESTIONS

- Do you believe that the Titanic was overconfident in its design and safety features?
- How do you think the Titanic disaster changed the way we view modern maritime safety?
- In your opinion, could the Titanic have been saved if the crew had acted differently after hitting the iceberg?
- Do you think the legacy of the Titanic still influences shipbuilding today?
